

# Scrap And Demolition & Material Handling Grapples

We manufacture many different types and sizes of grapples. These range from a car grapple with an eight foot opening to a small railroad tie grapple. We can custom manufacture a grapple for you and your specific application.

2 x 3 tine fully rotating scrap & demo grapple

We have a variety of scrap grapples available. All rotating grapples are 360° continuous rotating. All pins and bushings are made of heat-treated material and are lubricated easily through grease fittings.

Our grapples feature:

- Hi-tensile T-1 steel tines
- All tines hard surfaced
- Heavy-duty rotators
- Heavy-duty cylinders
- Stress proof pins
- Replaceable bushings at all hinge points
- Protected grease fittings

Heavy duty car grapple with 8' 6" opening

All grapples are furnished with or without the hanger that will fit your boom.

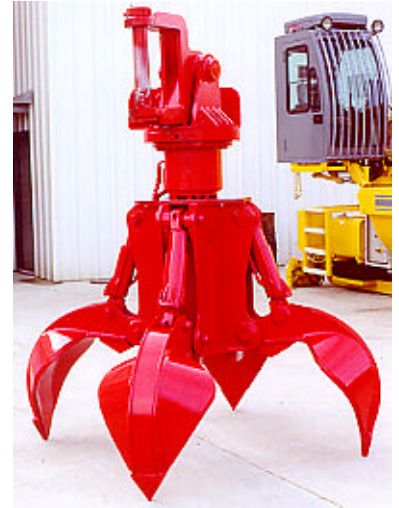

All grapples are complete with all hoses and fittings.

If you need an application specific grapple designed and manufactured we can help you.

Contact us for further information and a quotation.
